£90 / €99
offer price: £70 / €79

The Geology of Ireland is the definitive guide to the geology of the island of Ireland as a whole. This completely revised edition has been updated to reflect the ten years of research undertaken since the last edition was written. For the first time the work is presented with colour illustration, where appropriate, throughout the text. It presents the geology of the island in geological sequence and deals also with the economically important offshore geology of Ireland. Full contents list as below.

Reviews of the first edition:

"... a wealth of valuable information... well illustrated... a valuable reference."
Geological Magazine

"This book is an excellent introduction to the geology of Ireland... a full suite of references gives the reader an excellent entry point into the details of Irish geology."
Newsletter of the Palaeontological Association

"a mountain of data, unashamedly scholarly and stuffed with references."
New Scientist

"This book is a necessity and will be used widely both as a reference and as an essential aid."
Environmental Geology

Charles Hepworth Holland is the retired Professor of Geology and Mineralogy at Trinity College, Dublin where, as a Fellow Emeritus, he still works. He is a past President of The Geological Society and of the Palaeontological Association. **Ian S. Sanders** is a senior lecturer, Department of Geology, Trinity College, Dublin.

CONTENTS

1. Introduction (C.H. Holland and I.S. Sanders); **2.** Precambrian (J.S. Daly); **3.** Ordovician of the North (J.R. Graham); **4.** Grampian Orogeny (D.M. Chew); **5.** Cambrian of Leinster (C.H.

Holland); **6.** Ordovician of the South (J.R. Graham and C.J. Stillman); **7.** Silurian (C.H. Holland); **8.** Late Caledonian orogeny and magmatism (D.M. Chew and C.J. Stillman); **9.** Devonian (J.R. Graham); **10.** Carboniferous – Mississippian: Tournaisian and Viséan (G.D. Sevastopulo and P.N. Wyse Jackson); **11.** Carboniferous – Mississippian: Serpukhovian and Pennsylvanian (G.D. Sevastopulo); **12.** Variscan deformation and metamorphism (J.R. Graham); **13.** Permian and Mesozoic (M.J. Simms); **14.** Tertiary igneous activity (J. Preston); **15.** Cenozoic: Tertiary and Quaternary – until 11,700 years before 2000 (P. Coxon and S.G. McCarron); **16.** The Holocene (F.J.G. Mitchell); **17.** Geology of offshore Ireland (D. Naylor and P.M. Shannon); **18.** Geophysical evidence onshore (T. Murphy, A.W.B. Jacob, and I.S. Sanders); **19.** A history of Irish Geology (G.L. Herries Davies); Full References and Index

Offer closes 1 May 2009, payment instructions must accompany your order.
